

Support that is second
to none

**Bateman 365 is our promise to you;
parts and service support available
7 days a week, 365 days a year.**

IN-HOUSE TECHNICAL SUPPORT

A phone call to our office will put you in touch with our sprayer specialists, who with their wealth of knowledge, will more often than not get you up and running without the need of a service visit. Because of the practical layout and simplicity of functions on our sprayers, many problems can be quickly remedied over the phone.

UK-WIDE SERVICE ENGINEERS

If we can't help you fix your problem over the phone, we run our own team of dedicated service engineers, trained in-house, covering the whole of the UK and Ireland. This means we are able to prioritise calls to breakdowns and ensure that our engineer will have the right parts for your sprayer. Our service engineers are not paid by the hour, so they won't leave you until you're back up and running.

UNRIVALLED PARTS AVAILABILITY

Because we manufacture the majority of the parts fitted to a Bateman sprayer in-house, you will find that in many cases we'll have the part you are looking for on our shelves, for all eras' of sprayers and available for immediate dispatch.

WHAT THIS MEANS FOR YOU

- In-house technical support available 7 days a week, 365 days a year
- Dedicated field engineers trained in-house on all aspects of Bateman sprayers
- Fully equipped vans covering the whole of the UK
- Unrivalled parts service with majority of parts manufactured by Bateman
- Same day and next day parts delivery
